

IN THE CLAIMS

1. (Currently Amended) A memory card drive, comprising:

a memory card drive body ~~having a memory interface and provided with a shape~~
~~capable of being~~ configured to be inserted into a memory card drive slot of a personal
computer and to connect to an external interface of the personal computer after insertion;

a memory interface configured to allow the memory card drive to send and receive
digital information to and from the personal computer;

a plurality of memory card slots provided in said memory card drive body oriented in
a planar array to accept a plurality of memory cards in the same loading orientation; and

~~a plurality of memory cards, detachably accommodated in said memory card slots,~~
~~into and from which digital information is recorded and played back through the memory~~
~~interface;~~

a plurality of indicator LEDs corresponding to the plurality of memory card slots.

2. (Original) A memory card drive according to claim 1, wherein said memory card
slots are provided in a memory card tray that is loaded into and unloaded from said memory
card drive body.

3. (Currently Amended) A portable memory card drive, comprising:

a portable memory card drive body ~~having a memory interface and provided with a~~
~~shape capable of being~~ configured to be inserted into a portable memory card drive slot of a
personal computer and to connect to an external interface of the personal computer after
insertion;

a memory interface configured to allow the memory card drive to send and receive
digital information to and from the personal computer;

a plurality of memory card slots provided in said portable memory card drive body oriented in a planar array to accept a plurality of memory cards in the same loading orientation; and

~~a plurality of memory cards, detachably accommodated in said memory card slots, into and from which digital information is recorded and played back through the memory interface;~~

a memory card selector switch configured to select among the plurality of memory card slots.

4. (Original) A portable memory card drive according to claim 3, wherein said portable memory card drive body includes a power supply.

5. (Original) A portable memory card drive according to claim 3, wherein said memory card slots are provided in a memory card tray that is loaded into and unloaded from said portable memory card drive body.

6. (Original) A portable memory card drive according to claim 3, further comprising an opening/closing cover pivotally attached to said portable memory card drive body for movement between an open position, in which the memory cards are exposed, and a closed position, in which said opening/closing cover covers the memory cards.

7. (Original) A portable memory card drive according to claim 4, wherein the power supply is at least one battery that is included in said portable memory card drive body.

8. (Original) A portable memory card drive according to claim 4, wherein the power supply is a battery pack that is detachably attached to said portable memory card drive body.

9. (Original) A portable memory card drive according to claim 4, wherein the power supply is at least one battery that is included in a portable holder detachably attached to said portable memory card drive body.
